

Maximize the safety of your workforce with better accuracy and program automation.

When your workforce isn't operating safely, you feel the effects.

- Your insurance costs go up.
- You can't calculate your overall risk due to insufficient data.
- You find it impossible to review and coach every violation.
- You have no visibility into the behavior of third-party workers.

You need to automate your workflows to maximize safety.

The Tourmo AI-powered platform can help you maximize the safety of your workforce through improved accuracy and program automation.

Generate accurate data

Ensure participation and compliance

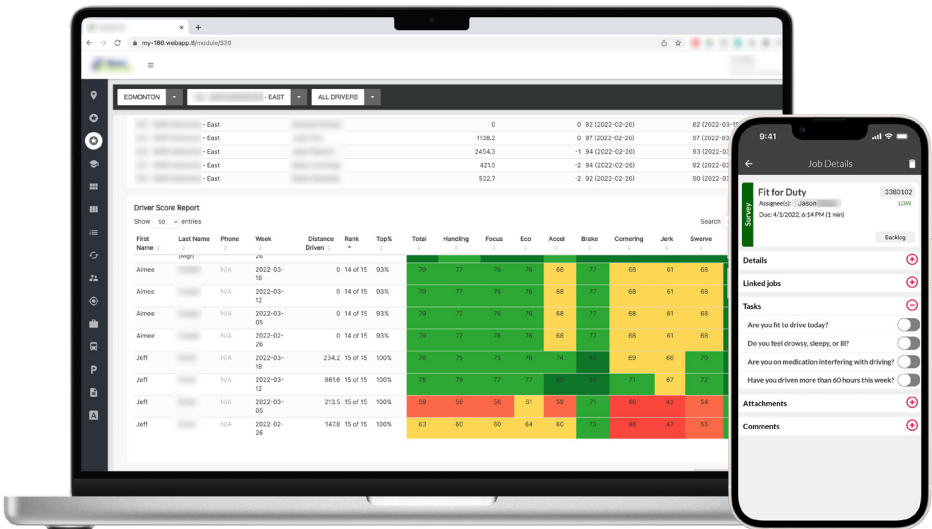

Assess risk in context

Involve management only when necessary

Maximize safety through automation.

- Build a successful safety program based on fair evaluation, unbiased assessment, and consistent application of policies.
- Assess your drivers' risks by distinguishing between driving behavior they control and factors in their environment that they cannot control. Take the context (e.g., weather, terrain, traffic, etc.) into account to ensure you can provide fair and consistent feedback despite varying driving conditions.
- Offload the work and communications from your managers to an automated workflow and allow an escalation process to bring managers into the loop only when needed.

Transform your mobile workforce operations with Tourmo's automated workflows.

What can you accomplish with total visibility?

Increase Safety

Up to **25%**

reduction in vehicle accidents.

Lower Cost

Up to **10%**

reduction in insurance premiums.

Improve Participation

Up to **50%**

increase in driver engagement.

"With the Tourmo platform, we've seen a drastic reduction in rollovers – zero rollovers in Q4 – a reduction of about 80%. This, along with fewer incidents, reduced our insurance premium by \$500,000. I've been in the fleet/driver management business for a long time, and I never thought I would hear my drivers approaching their managers and ask, 'How else can I improve my score?'"

– VP of Operations,
Large U.S. Building Supply Company
